

# Abdurakhman Abdibaitov

Frontend Developer | Next.js | React

abdibaitovabdurahman@gmail.com   [Linkedin](#)   [GitHub](#)   [Portfolio](#)   +996 559 70 85 15

## SUMMARY

Passionate Frontend Developer with 1 year of experience. Skilled in developing single-page applications SPA and integrating APIs. Quick learner with strong analytical skills and attention to detail.

## EXPERIENCE

### Junior Frontend Developer [I Ant IT company](#)

[iant-studio.vercel.app](#)    11/2024   Present    Bishkek, Kyrgyzstan

IANT is an IT company specializing in providing high-quality web development services. The company's primary focus is on creating modern websites that help automate business processes.

- Implementation of responsive web applications. Contributed 50% to the development of the IANT portfolio website. My responsibilities included interface design and responsive layout implementation.
- Teamwork. Creation of large-scale projects. Actively contributed 70% to project development.
- Built projects using RTK Query, optimized API integrations, and implemented efficient state management, caching, and error handling.

### Intern Frontend Developer

[Motion Web IT academy](#)    08/2024   11/2024    Bishkek, Kyrgyzstan

[fake-store-blush-nu.vercel.app](#)

MotionWeb is a major IT company that develops projects for businesses and entrepreneurs. It also offers programming courses for students.

- During my professional training, I developed my own pet projects. My responsibilities included designing the application architecture and user interface. I implemented various features such as sorting, a shopping cart, and search functionality 100% . I also independently built the backend of the application using Supabase and Prisma ORM 100% .
- Completed professional training in 3 months, during which I developed over 10 projects of varying complexity.
- Constructed online chats using WebSocket.

### Intern Frontend Developer

[App IT Company](#)    09/2024   09/2024    Bishkek, Kyrgyzstan

App IT is a large IT company specializing in the development of websites and mobile applications. The company offers services in website and mobile app creation, as well as programming education.

- Contributed 3% to the development of a student website. The website provided information about students and class schedules, as well as the ability to make online tuition payments.
- During the internship, we actively used Material UI, contributing to 70% of its implementation.
- Worked in a team and used Git for version control. Gained experience in team collaboration.
